

1. Get formatted name by using def function:

Ans:

```
1  def format_name(first_n, last_n, middle_n = ''):    # Default argument of 'middle_n' = none
2      if middle_n:                                    # If true then execute this
3          full_n = f'{first_n} {middle_n} {last_n}'
4      else:                                           # Otherwise execute this
5          full_n = f'{first_n} {last_n}'
6      return full_n.title()
7
8  name = format_name('jimi', 'hendrix')
9  print(name)
10
11 name = format_name('jimi', 'hendrix', 'X')
12 print(name)
13
```

Result:

```
C:\Users\Aorus\Desktop\python>format_name.py
Jimi Hendrix
Jimi X Hendrix
```
